Ehrman Industries Introduces Innovative Mounting Bracket

This new patent pending technology protects license plates from damage and adheres to federal lighting requirements

Pittsburgh, PA (January 25, 2010) – Utility trailer owners can now protect their license plates from damage and rest assured that they are compliant with federal lighting requirements. Ehrman Industries, LLC introduces the patent pending Plate Saver™, the lighted mounting bracket that vastly improves the manner in which license plates are secured to utility trailers.

The Plate Saver's innovative technology allows a license plate to be mounted above the standard taillight or on the rear gate, not only protecting the plate from damage caused by limited ground clearance, but most importantly, meeting federal lighting requirements, saving the aggravation of being pulled over, ticketed and fined for noncompliance.

“We see the Plate Saver as the perfect solution to ground clearance issues that many trailer owners have encountered in the field with their utility trailers,” said Sean Ehrman, president and owner of Ehrman Industries, LLC. “After designing the Plate Saver as a solution to a problem I experienced, I realized that it could help others who have had the same issue.”

Utility trailers typically have a steel, plastic or rubber license plate mount that attaches below the taillight often limiting clearance, causing the license plate damage or loss from contact with the road or other obstacles. Incorrect mounting occurs when the plate is moved above the taillight or rear of the trailer to protect it from these issues, no longer illuminating the plate.

Federal requirements state that a license plate needs to be illuminated by a white light. The Plate Saver lighted mounting bracket allows more clearance, flexibility with the mounting location, and a light that illuminates the plate according to these requirements. The easy to install Plate Saver has the versatility to be installed on utility trailers with drop gates by using the optional accessory kit.

“We are really excited about this product,” said Ehrman. “Ehrman Industries is dedicated to providing the best product solutions and customer service. We believe the Plate Saver can save utility trailer owners money, time and aggravation.”

About Ehrman Industries, LLC

Founded in 2009, Ehrman Industries, LLC is committed to producing quality, innovative product solutions. Ehrman Industries works closely with clients and manufacturers to ensure they receive the best product and service available. For more information on Ehrman Industries, visit www.ehrmanindustries.com.
